SUMMARY

IT support professional and CS graduate with 3+ years of technical experience in accessibility auditing, software troubleshooting, and working directly with end users. Known for managing 20+ concurrent support cases with a 100% completion rate, thorough documentation, and clear communication across technical and non-technical teams. Bilingual in English/Spanish and comfortable in both remote and on-site environments.

EDUCATION

California State University, Los Angeles - B.S. in Computer Science, Graduated May 2026 | GPA: 3.4

EXPERIENCE

ITS Accessibility Tester | California State University, Los Angeles Hybrid (Remote and On-Site) | Aug 2023 – Present

- Managed 20+ active accessibility support cases at a time with a 100% file completion rate; tracked each case in Excel, caught errors early, and followed up with developers and site owners until issues were fully resolved.
- Ran Section 508 and WCAG 2.2 audits on campus websites and documents (PDF/HTML/PPT) using JAWS, WAVE, Equidox, and axe-core; documented findings clearly and escalated issues that needed additional review.
- Sent regular written updates to developers, site owners, and department leads on case progress; kept notes detailed enough that anyone on the team could pick up a case mid-stream without needing a briefing.
- Worked directly with developers to explain accessible front-end patterns and ARIA fixes across multiple active projects.

Front-End Lead and Communications | Unbox3D - DEVCOM Army Research Laboratory Capstone Los Angeles, CA | Aug 2025 – May 2026

- Managed the Jira board for a 10-person team building a Windows desktop application for the U.S. Army; created and assigned tickets, tracked progress, and made sure blockers were addressed quickly, which mirrors how IT service desks handle ticket queues.
- Served as the main contact between the team, our faculty advisor, and the Army liaison at DEVCOM; wrote weekly summaries and kept communication clear across a 9-month project.
- Built and debugged a C#.NET 8 Windows desktop application, gaining solid experience tracing issues across the UI, application layer, and underlying Windows environment.

Student Ambassador | OpenAI (ChatGPT) Los Angeles, CA | Sept 2025 – Dec 2025

- Acted as the first point of contact for 20 to 50 attendees per workshop when something was not working; resolved access and tool issues in real time and escalated anything beyond the scope of the session to the right contact.
- Coordinated with 5+ campus departments on event logistics and pre-event follow-up; kept organized records of completed tasks and open items leading into each session.

Retail Sales Associate | Petco Westwood / West LA, CA | Oct 2021 – Mar 2022

- Processed 50+ customer transactions daily with zero cash-handling errors; stayed accurate and professional through high-volume periods.

TECHNICAL SKILLS

Operating Systems and Software: Windows 10/11, macOS (primary OS; hardware and software troubleshooting), Unix/Linux command line (bash, file system navigation, permissions); Microsoft 365 (Outlook, Excel, Teams, Word, OneDrive), Google Workspace
