EDUCATION

California State University, Los Angeles — B.S. in Computer Science, Graduated May 2026 | GPA: 3.4

EXPERIENCE

Front-End Lead & Communications | Unbox3D — DEVCOM Army Research Laboratory Capstone Los Angeles, CA | Aug 2025 – May 2026

- Served as Front-End Lead and Communications lead on a 10-person team building a U.S. Army-sponsored desktop tool (C#, WPF, .NET 8) that converts 3D vehicle models into laser-cutter-ready 2D templates for military ISR training aids.
- Owned Stage 1 of the pipeline: built the WPF/OpenTK interface that imports and renders OBJ vehicle models in an interactive OpenGL viewport, making the 3D scene space manually accessible with camera controls, mesh selection, gizmos, and a ruler overlay — the largest module in a 12,508-line codebase.
- Served as primary point of contact between the 10-person team, faculty advisor (Dr. David Krum), and U.S. Army liaison (Dr. Eric Holder / ARL); produced weekly status summaries and coordinated sprint goals via GitHub and Jira to ensure on-time delivery.

Student Ambassador | OpenAI (ChatGPT) Los Angeles, CA | Sept 2025 – Dec 2025

- Selected for the inaugural CSU-wide ChatGPT Ambassador program representing CSULA to advance AI literacy across 23 campuses.
- Co-coordinated 2+ AI literacy workshops (20–50 participants each), handling venue logistics, attendee communications, and day-of support; received consistently positive feedback from attendees and faculty partners.
- Produced all interactive workshop materials and mentored peers on integrating AI into research, writing, and career development with an emphasis on responsible and ethical use.

ITS Accessibility Tester | California State University, Los Angeles Remote | Aug 2023 – Present

- Maintained 100% file completion rate across 20+ active accessibility cases by tracking document status, flagging errors proactively, and driving timely corrections through structured follow-up.
- Conducted Section 508/WCAG 2.2 audits for campus web assets and documents (PDF/HTML/PPT) using JAWS, WAVE, and Equidox; verified fixes and regressions; documented repeatable audit checks.
- Advised developers on ARIA patterns and accessible front-end components; partnered with site owners on remediation and maintained clear notes for reporting to leadership and stakeholders.

PROJECTS

Unbox3D | DEVCOM Army Research Laboratory - Front-End Lead | C#, WPF, OpenTK, OpenGL, .NET 8 [GitHub](#)

- Built the WPF/OpenTK desktop UI for a U.S. Army-sponsored tool that converts 3D vehicle models into laser-cutter-ready 2D templates for military ISR training; owned the OpenGL viewport, camera, gizmos, mesh selection, and ruler overlay across a 12,508-line C# codebase.
- Implemented the full model import and render pipeline (Stage 1) using Assimp and OpenTK — making the 3D scene space manually accessible and interactive for a 10-person team shipping to DEVCOM ARL.

Monte Sion Center | Food Bank Website - React Developer [Live Site](#)

- Built a bilingual (EN/ES) public-facing website in React (Vite) + Tailwind CSS with i18n JSON for non-technical staff updates; now used daily for food distribution schedules, contact info, and donations.

Custom GPT Tools | Creator

- Swift Playground Assistant - iOS/SwiftUI GPT that compiles and tests Swift Packages via GPT Action, helping beginners debug and iterate faster. [Try it](#)
- Web Accessibility Auditor - audits pages for WCAG 2.1/2.2 via Playwright + axe-core; generates high-quality alt text and outputs strict JSON with copy-paste fixes. [Try it](#)

The Chat Games | ChatGPT Ambassador Program - Co-Founder, Co-Host & Web Developer [Live Site](#)

- Co-founded a CSU initiative to teach ethical AI use in partnership with OpenAI EDU; built and maintained thechatgames.com (Bootstrap 5, accessible UI, captioned demos, Formspreet RSVP/contact).

SKILLS

Languages & Frameworks: C#, HTML, CSS, JavaScript, React, Bootstrap, Tailwind CSS, Python, Swift, Git, WPF, LLMs

Accessibility: WCAG 2.1/2.2, ARIA, Section 508 audits, JAWS, WAVE, Equidox, axe-core, Playwright

UX/UI: Responsive design, OpenGL/3D viewport UI, component systems, user testing, SwiftUI, i18n/localization

Collaboration: Stakeholder coordination, technical documentation, Agile/Jira sprint planning, cross-functional communication
